

Automated Detection & Response (ADR)*

Traditional MDR was built around humans reviewing alerts, opening tickets, and deciding what to do next. That delay matters. Third Wave ADR changes the model entirely. We detect, verify, and contain threats at machine speed, while giving your business clear visibility into what happened, why it mattered, and how it was resolved.

You focus on your business. Third Wave handles the threats.

1,801 Millisecond Response Time

ADR investigates threats in milliseconds, while traditional MDR can take hours due to manual analyst review.

99.99% Alert Noise Reduction

ADR filters out noise so your team only sees what matters, reducing wasted time and missed priorities.

Containment in Seconds, Not Hours

Traditional MDR relies on human analysts adding avoidable dwell time. ADR automatically contains verified threats in seconds.

Don't Wait Until an Incident Becomes a Business Crisis

Most MDRs Alert You. Third Wave ADR Acts.

Third Wave ADR is designed to integrate seamlessly into the tools businesses already use and to deliver value all the way to executive leadership, auditors, and insurers.

Rapid Setup

Onboarding takes under an hour no rebuilds, no downtime. Works with Microsoft 365, Entra ID, CrowdStrike, SentinelOne, Okta, Fortinet, and Google Workspace.

User Verification

Instead of chasing people through tickets, Third Wave ADR verifies activity directly with users via Slack, Teams, or SMS in seconds.

Executive Visibility

Clear reporting on response activity, incident trends, and performance metrics built for board reporting, audits, client assurance reviews, and cyber insurance conversations.

Cyber Insurance Alignment

Using Third Wave ADR may qualify you for up to a 12.5% premium credit at cyber insurance renewal, connecting cybersecurity performance directly to business risk outcomes.

Try Third Wave Free for 30 Days

Right now, Third Wave is offering a **free 30-day trial** of Automated Detection & Response (ADR) and Cyber Risk Protection.
