

"NO-BRAINER"

Incident Response Retainer

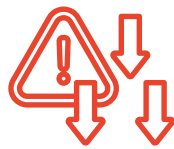

The "No-Brainer" Retainer provides your organization with access to an elite team of incident response experts on **24/7/365 standby** giving you the ability to respond instantly in the event of a security incident. Fast response is critical in order to minimize the potential damage of an adverse cyber event.

Our expert team will already be familiar with your network and can deploy intelligent recovery measures based on intimate knowledge of your business. Plus, any purchased retainer hours can be used for other Blue Team Alpha services if you don't run into trouble during the life of your contract, making our retainer a **risk-free** cybersecurity investment.

We are ready before you need us

Have **resources available** for urgent escalations as well as general IR expertise. Access to prepaid retainer hours ensures the availability of our IR experts within a predefined time to help identify root cause, incident scope, or other activities related to potential threats. Our onboarding process builds familiarity with your environment, technology and capabilities to **expedite evaluation timelines** upon escalation.

A "no-brainer" security investment

100% credit given for any unused retainer hours towards future services like risk assessments, pen testing, tabletop exercises, IR plan creation, vulnerability scans, security engineering projects, and more. There's no downside - if you don't have an incident, you can apply the full value toward other critical security needs that you have already budgeted for. It's a **win-win solution** to ensure you're prepared for incidents while maximizing the value of your cybersecurity investment.

Experienced, & certified security professionals

Our team has **decades of experience** in incident management, security and threat intelligence, corrective actions, and has handled **hundreds of breach investigations** and cyber incidents.

Our highly seasoned, certified incident response experts will reduce your response time, **minimize the impact of a cyberattack**, and help you recover faster.

Step-by-Step

INCIDENT RESPONSE METHODOLOGY

Our approach to IR is different. We eradicate the threat actor AND support business continuity. Blue Team Alpha works to recover your machines and network so you can get back online and return to normal business.

During a cyberattack, time is your most critical resource. **Be prepared.** Have an elite team of experts on standby to enable you to respond faster, reduce business impact AND reestablish business continuity.

Put an ELITE, Highly Trained Team on Your Side

Blue Team Alpha isn't just another cybersecurity provider; we're a mission-driven company forged from the ranks of America's **top cyber defense agencies**. Our team brings unparalleled expertise honed within the Department of Defense, Homeland Security, CIA, NSA, FBI, and other elite government organizations.
